

Bridging the Gap Between Digital Systems and Physical Assets Through Asset Identification Solutions & Deployment Support Services

Full Implementation Support for Asset & Facility Management Systems

Camcode helps organizations reduce the deployment burden of asset management systems by offering turnkey services and asset identification solutions. This allows your team to implement a system quickly and easily, and start tracking sooner.

Deployment Services

- On-site label installation services
- Asset walkdowns and in-field data validation
- Serialized label data preparation and formatting
- Dedicated online ordering portals
- Specialized packaging for optimal label installation

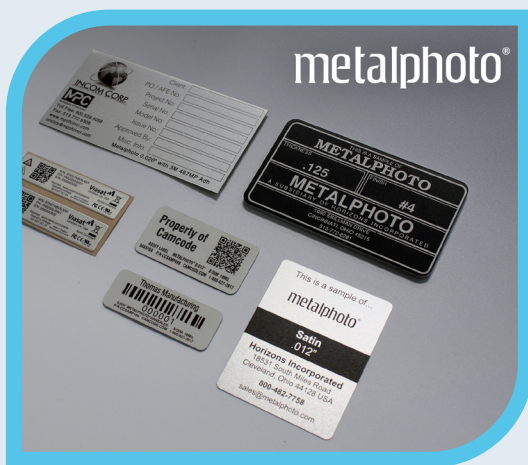

Why Asset & Facility Managers Trust Camcode

Camcode is an asset enablement partner that helps companies close the gap between digital systems and field execution. We help your team by delivering:

- **Faster Onboarding**
Customers can quickly move from implementation to active field use with a standardized, serialized asset labeling program tied directly to their software records.
- **Stronger Mobile User Adoption**
Permanent scannable asset labels make it easy for technicians to identify the correct asset and engage mobile workflows at the point of service.
- **Improved Data Integrity**
Physical asset identification reduces duplicate records, manual entry errors, incorrect meter readings, and inconsistent asset naming across facilities.
- **Elimination of Relabeling**
With uniquely durable asset labels that last over 20 years in the harshest environments, Camcode eliminates the cost, man hours, and downtime resulting from damaged, faded, or otherwise illegible labels and replacing them.
- **Expert Asset Management Consultation**
Trusted since 1950, Camcode's asset identification and management experts can help select the optimal identification solutions and deployment services for your project to ensure everything works seamlessly.

Durable QR Code Labels That Automate Asset, Maintenance, and Facility Management

Camcode's durable QR code labels connect physical assets to digital systems, making asset, facility, and maintenance software easier and more powerful to use. A quick scan gives teams instant access to records, work orders, manuals, and compliance data at the point of use, reducing errors and speeding inspections and repairs. Built for harsh environments, Camcode labels deliver long-term reliability that boosts uptime, accountability, and software ROI.

Specialized Material Options For Labels That Last The Life of The Asset

Camcode offers labels in many plastic and metal materials, including Metalphoto®—photosensitive anodized aluminum with a sub-surface, sealed silver-and-black image for unmatched durability. With over 20 years of outdoor service life and resistance to abrasion, UV, chemicals, extreme temperatures, and saltwater, Metalphoto is recognized by GPI as the most durable printed aluminum substrate. Trusted for 50+ years by industrial, government, and military leaders like Caterpillar, NASA, Boeing, and the U.S. Navy, Metalphoto delivers proven long-term performance.
